Art Unit: 3724

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Billie Jean Longstreth on 16 January 07.

The application has been amended as follows:

The one claim has been cancelled and replaced with a new claim as follows;  
--I claim a vegetable cutter that is non-powered and hand-operated for cutting and chopping vegetables comprising;

a hollow, metal, cylindrical body having two ends and when placed in a vertical position has a top and a bottom that are connected by a cylindrical wall, the top is sealed closed by a first flat disk and the bottom is sharpened to a smooth, thin, annular cutting edge,

a handgrip permanently affixed to and covering the top of the cylindrical body, the handgrip consisting of a second flat disk having a depending circumferential portion that extends slightly over onto the wall of the cylindrical body and provides additional strength to the cylindrical body,

a removable protective cover, that when placed over the cutting edge serves as a shield from injury, and protects the cutting edge from becoming damaged when the device is not in use, the cover consisting of a third flat disk having an upending

circumferential portion that extends slightly over onto the wall of the cylindrical body to releasably retain the cover on the cylindrical body.--

2. Made of record but not making Applicant's invention obvious are patents to Harrison, Cianflone and Engstrom.

The end of Harrison's cylinder (6) is not a flat disk, and the handgrip has a hole in it, and thus is not considered to be a flat disk. Harrison also lacks a protective cover.

Cianflone shows an annular blade with a protective cover (50), but adding that to Harrison would not overcome all of Harrison's shortcomings.

Engstrom shows an annular blade with a protective cap (15), but it has a blade (10) thereon and thus does not consist of a flat disk and upending portion.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth E. Peterson whose telephone number is 571-272-4512. The examiner can normally be reached on Mon-Thur, 7:30-4:30.
